

ATAIMO EDEM

CUSTOMER SUCCESS ENGINEER | SOLUTIONS ARCHITECTURE | API MANAGEMENT

Cloud-Native Platforms • Kubernetes • Enterprise Integration • Customer Engineering

Lagos, Nigeria | contact@ataimo.com | ataimo.com | edemataimo@gmail.com | +234 816 0594 893 | [LinkedIn](#) | [GitHub](#)

EXECUTIVE PROFILE

Customer-facing technical engineer and solutions architect specialising in API Management, cloud-native platforms and enterprise integration. Currently a Customer Success Engineer at Tyk, owning post-sales technical success across EMEA - from architecture reviews, upgrades and migrations to production troubleshooting, API security, observability and product escalation. Hands-on across REST/GraphQL, OpenAPI/OAS, OAuth 2.0/OIDC/JWT/mTLS, Kubernetes, Redis, PostgreSQL, MongoDB, Kafka, OpenTelemetry and Azure/AWS/GCP. Independently built and operate ataimo.com, a production Azure/Kubernetes consultancy platform demonstrating infrastructure automation, federated identity, event-driven messaging and observability.

API & SOLUTION ARCHITECTURE

Tyk • REST • GraphQL • OpenAPI
Hybrid & Multi-DC • Enterprise Integration

CLOUD-NATIVE PLATFORM

Kubernetes • Helm • OpenShift
Azure • AWS • GCP • Redis • Kafka

CUSTOMER ENGINEERING

Architecture Reviews • Workshops
L2/L3 RCA • Upgrades • Observability

PROFESSIONAL EXPERIENCE

Customer Success Engineer

Tyk | Greater London / Remote | Jul 2025 - Present

- Own post-sales technical engagements for enterprise customers across EMEA, leading architecture reviews, adoption planning, platform upgrades, migrations, production troubleshooting and operational readiness.
- Guide complex deployments across Tyk Gateway, Dashboard, Pump, MDCB/Hybrid, Enterprise Developer Portal, Operator, Streams and GraphQL, translating requirements into scalable and supportable deployment patterns.
- Troubleshoot complex L2/L3 issues spanning Kubernetes, networking, API gateways, Redis, PostgreSQL/MongoDB, Kafka, cloud infrastructure and application dependencies; reproduce defects and partner with Product and Engineering through resolution.
- Advise on API security, identity, resilience and high-availability patterns using OAuth 2.0, OIDC, JWT, mTLS and SAML, including hybrid and multi-data-centre architectures.
- Support observability and performance initiatives using OpenTelemetry, Prometheus and analytics pipelines, while converting recurring customer needs into product defects, feature requests and actionable technical feedback.

Customer Solutions Architect

Tyk | Greater London / Remote | Dec 2021 - Jul 2025

- Owned the technical dimension of strategic customer engagements, translating business and platform requirements into practical API Management architectures, implementation plans and adoption roadmaps.
- Led technical discovery, architecture reviews and workshops covering API design, deployment topology, Kubernetes/cloud infrastructure, network connectivity, resilience and integration patterns.
- Designed and validated solution approaches across Tyk Gateway, Dashboard, Pump, Hybrid/MDCB, Operator, Developer Portal and GraphQL capabilities, including proofs of concept and hands-on troubleshooting.
- Advised customers on API security and identity patterns including OAuth 2.0, OIDC, JWT, mTLS and SAML, helping align implementation choices with enterprise security and governance requirements.
- Guided customer onboarding, implementation, platform upgrades and migration planning, identifying dependencies, compatibility risks and operational-readiness considerations before production change.
- Partnered across Customer Success, Support, Product and Engineering to reproduce complex product issues, shape feature requests, represent customer requirements and drive technically complex engagements to resolution.

Azure Developer Support Engineer - Stage 3 (L3)

Tek Experts - Microsoft Azure Support | Lagos, Nigeria | Oct 2021 - Jan 2022

- Resolved escalations from Stage 2 engineers across Azure API Management, Cloud Services (Classic), Azure Resource Manager, Blueprints, Lighthouse, Managed Applications, Azure Policy and Azure Batch.
- Designed and troubleshoot customer solutions involving API Management virtual-network integration, Azure AD/identity integration, certificate authentication and custom APIM policies.
- Developed ARM templates, Azure Blueprints and PowerShell automation, and worked with Azure Management APIs to support repeatable customer deployments and administration.
- Mentored and trained Stage 2 engineers on supported Azure technologies and troubleshooting approaches, while coordinating complex cases through deeper escalation paths when required.
- Supported Cloud Services deployment troubleshooting and Azure Lighthouse onboarding for customer environments.

Azure Developer Support Engineer - Stage 2 (L2)

Tek Experts - Microsoft Azure Support | Lagos, Nigeria | Sep 2019 - Oct 2021

- Provided customer-facing technical support for Microsoft Azure, investigating and resolving cloud infrastructure and platform issues through structured troubleshooting and root-cause analysis.
- Diagnosed incidents spanning Azure services, networking, configuration and application dependencies, reproducing failures and guiding customers toward sustainable technical resolutions.
- Worked directly with customers to gather diagnostics, explain technical findings and own incidents from initial triage through resolution and follow-up.
- Collaborated with internal engineering and escalation teams on complex or product-related incidents, building strong foundations in cloud architecture, API Management and production support.

Mobile and Web Developer

Klex Global Resources | Lagos, Nigeria | Oct 2018 - Oct 2019

- Designed and developed mobile applications using Flutter and Java/Android, covering front-end UI/UX, application logic and production publishing to Google Play.
- Built RESTful web services and JSON-based integrations to existing databases, and developed web content for the company website and school portal.

Application and Software Developer

Logic Gate Ventures | Minna, Nigeria | Mar 2016 - Dec 2016

- Built informative and data-driven websites using HTML5, CSS, JavaScript, PHP and MySQL, including deployment through cPanel.
- Developed JavaFX desktop interfaces and applications, and created simulations and models using AnyLogic.

SELECTED TECHNICAL PROJECTS

Enterprise Developer Portal Migration Automation Designed and built an end-to-end Go migration solution for Tyk Classic Developer Portal to EDP. Addresses the absence of a built-in migration path that preserves developer access by retaining API keys and login credentials while providing discovery, backup, dry-run planning, idempotent migration, reconciliation, rollback, cutover and controlled decommissioning. Go • REST APIs • Docker • Migration Engineering	Ataimo Portfolio & Consultancy Platform — ataimo.com Designed, built and deployed a full-stack engineering portfolio and consultancy platform on Azure K3s. Integrates Keycloak OIDC with native and four social sign-in providers, PostgreSQL-backed request-and-approve bookings, engagement/task tracking, private chat, an owner dashboard and mailbox, and installable PWA notifications. Uses Redpanda for background events, Prometheus/Grafana for live telemetry, Envoy Gateway for multisite routing, and cert-manager for TLS. Terraform, Ansible, Helm and GitHub Actions provision infrastructure and deliver app/worker images through Docker Hub; interactive 3D diagrams explain the deployed architecture. TypeScript • Next.js • React • Azure • Kubernetes • Terraform • Ansible • Helm • OIDC • PostgreSQL • Redpanda • CI/CD
Kubernetes CRD Migration Automation Built tooling to migrate Tyk Operator-managed CRDs - including APIs and policies - between Kubernetes clusters with discovery, backup, context remapping, validation, reporting and cleanup. Kubernetes • Bash • kubectl • yq • Tyk Operator	API Route Collision Analyzer Developed a Python CLI that detects duplicate or overlapping API routes from Tyk Dashboard data using domain/listen-path analysis, multiple match modes, table/JSON/CSV output and CI-friendly execution. Python • REST APIs • CLI • CI/CD • Troubleshooting
Tyk Hybrid Docker Environment Created a repeatable Docker Compose environment for Tyk Hybrid Gateway, Pump and Redis, supporting local troubleshooting, analytics testing and persistent or ephemeral Redis modes. Docker Compose • Tyk Gateway • Pump • Redis • Hybrid	Tyk API Key Hashing Utility Built a Go diagnostic utility to reproduce Tyk key hashing behaviour across Murmur32/64/128 and SHA-256 for key validation and troubleshooting. Go • API Security • MurmurHash • SHA-256

TECHNICAL SKILLS

API Platforms	Tyk Gateway, Dashboard, Pump, MDCB, Tyk Operator, Enterprise Developer Portal, Streams, GraphQL, REST, OpenAPI/OAS
Cloud & Containers	Microsoft Azure, AWS, GCP, Kubernetes, AKS, EKS, OpenShift, Docker, Helm
Data & Messaging	Redis, PostgreSQL, MongoDB, Kafka, Redpanda, Azure Event Hubs, OpenSearch/Elasticsearch
Security & Identity	OAuth 2.0, OIDC, JWT, mTLS, SAML, Entra ID, API Keys, Certificate Management
Observability	OpenTelemetry, Prometheus, Grafana, Loki, Tempo, Splunk Observability Cloud
Engineering	Go, Python, Bash, YAML, JSON, Git, CI/CD, kubectl, API automation, troubleshooting, performance analysis, TypeScript, React, Next.js, Terraform, Ansible, GitHub Actions

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert - Microsoft (Issued Oct 2021)
- Microsoft Certified: DevOps Engineer Expert - Microsoft (Issued November 30, 2021)
- Microsoft Certified: Azure Administrator Associate - Microsoft (Issued Mar 2021)
- Microsoft Certified: Azure Fundamentals - Microsoft (Issued Dec 2020)

EDUCATION

Federal University of Technology Minna
[Minna, Nigeria](#) | **2012 - 2018**
Bachelor's degree, Computer Engineering
